

All your plant data, ready to use.

Connects to your SCADA and OPC-UA systems and turns sensor data from industrial and renewable energy assets into one analysis-ready stream.

Schematic illustration

Easy to access

Filter by any variable, date and time. View the results online or download them as a file, and ask questions in plain language.

Ready for analytics

Continuous, clean data feeds anomaly detection, forecasting and prediction models on the same platform.

1 Connect

Reads from your existing SCADA and OPC-UA systems.

2 Store

Keeps time-stamped data locally on the edge device.

3 Use

Filter and download it, or feed it straight into AI models.
